

Prepare for Webinar #2, Talking Science: Homework!

Hello, Reflecting on Practice participants!

To prepare for our second webinar, Talking Science, on Friday, September 9th at 10:00am, we'd like you to do a little homework. We would like to discuss our experiences with asking questions, so please record 2-3 questions you asked in your teaching, and how learners responded to those questions. You can use the attached sheet to record your notes.

We're looking forward to another great discussion!

-Kate

Preparation for Webinar #2: Talking Science, on Friday, September 9, 2011, 10:00-11:00am

Before the webinar, please complete the following and have your responses on hand for the discussion.

You may either:

- 1) Watch a video of yourself teaching, or, if you are unable to videotape,
- 2) Have a colleague observe you and record the data.

From an example of your teaching, please record 2-3 questions you asked your learners, and how the learners responded.

Please record the specific wording you used, for example, "What does this feel like to you?" NOT "I asked learners to describe the feel." Please also record the learner(s)' response(s) as descriptively as possible, verbal ("Squishy!") and/or non-verbal ("Learner made a face and shook his/her head.")

Example 1

Question asked by the educator:

Learner response:

Example 2
